CAUSE AND EFFECT CHART

The **CAUSE** is the reason something happened. The **EFFECT** is what happens as a result.

The chart consists of two identical vertical sections. Each section features a large, rounded rectangular box on the left labeled 'CAUSE'. To the right of each 'CAUSE' box are three smaller, rounded rectangular boxes labeled 'EFFECT'. Three arrows point from the right side of each 'CAUSE' box to the top-left corner of each 'EFFECT' box, indicating a causal relationship.
