1. Write the word 'Greenbelt' on the board.

2. Ask students to turn to a neighbour and discuss what they think a Greenbelt is. (E.g., a clothing accessory, something you earn in karate, a natural area where people recycle, a protected natural region, etc.)

3. Share ideas as a class.

4. Project this map of Ontario's Greenbelt from Greenbelt.ca, a foundation with the purpose of ensuring that the Greenbelt remains "permanent, protected, and prosperous":

5. Ask students to share what they notice about the map. (E.g., it's in southern Ontario; it seems to be a strip of undeveloped land; it forms a connected band or belt beside large cities in Ontario like Toronto, Hamilton, and Niagara Falls; it touches Lake Ontario, Lake Huron, and Lake Simcoe; it's a big chunk of land; etc.)

6. Finally, invite students to set a purpose for reading the article, referring to the resource page Setting A Purpose Before Reading as needed.
In late September, Ontario Premier Doug Ford announced that the government was reversing its controversial decision to open up parts of the province’s Greenbelt to development. The announcement was a huge victory for environmentalists, First Nations, opposition parties, and other critics of the plan who had strenuously objected to the government’s proposal.

**The Ontario Greenbelt**
The Ontario Greenbelt is an 8100 square-kilometre region, larger than Prince Edward Island, that stretches from Bruce Peninsula in the north, where Lake Huron and Georgian Bay meet, to the Niagara Escarpment in the south. In the east it starts at Halton Region, home to Burlington and other municipalities, and extends west to Northumberland County on the northern shore of Lake Ontario.

The Greenbelt encompasses the Golden Horseshoe, one of the fastest growing urban areas in North America. Covering some 10,100 square kilometres, with Toronto at its centre, the Golden Horseshoe is home to nearly eight million Canadians, or about 20 percent of the nation’s population as a whole.

In 2005, the Greenbelt was established to permanently protect the region’s rich agriculture, fertile wetlands, and the natural habitat of resident species – at least 78 of which are at risk – from urban sprawl.

**A Change of Plans**
When he first ran for election in 2018, Mr. Ford promised that his government wouldn’t develop Greenbelt territory. But he also pledged to build 1.5 million homes before 2031 to address a housing emergency in the province, and the pressure to build new homes has only increased since that time due to rapid population growth.

Last year, Mr. Ford said that the government had no option but to change course and allow homes to be built in the Greenbelt. The new development would remove about 3000 hectares of land in 15 areas of the protected region. However, in exchange, nearly 4000 hectares would be added to the Greenbelt in other areas.

**Strong Opposition**
Environmentalists were quick to oppose the plan. They argued that swapping acreage that is highly vulnerable for land that is less at risk runs counter to the Greenbelt’s purpose.

“This idea that you can destroy part of the Greenbelt and then somehow make up for it – it’s just not the way the natural world works,” said Gideon Forman, an analyst with the Suzuki Foundation. “When you start to take chunks of the Greenbelt out of the Greenbelt, you compromise the integrity of an ecosystem. And that’s what’s so damaging.”

Opponents also argued that the land swap wasn’t necessary, and a task force commissioned by Mr. Ford’s own government agreed. In 2022 it reported that there was enough

ONTARIO’S GREENBELT SCANDAL
– Premier Ford Reverses His Government’s Controversial Decision

land outside the Greenbelt to address the housing shortage despite the premier’s claims.

AN $8.3 BILLION SCANDAL!
As questions about the plan mounted, and as public outcry grew, Auditor General Bonnie Lysyk and Ontario Integrity Commissioner David Wake launched separate inquiries into the government’s decision to encroach on Greenbelt land. Their conclusions, released in August, shocked many people.

Ms. Lysyk reported that before decisions were made in 2022 about which Greenbelt land to remove, Ryan Amato, a key figure in the Ontario housing ministry, received a package at an industry function. In it were recommendations on the topic from developers – some of whom had donated money to the Ontario Progressive Conservatives. With no input from unbiased experts, the government eventually accepted all but one of the builders’ 15 proposals, giving them access to buy 92 percent of the land taken from the Greenbelt.

Critics hint that Mr. Ford’s government might have alerted these donors that highly valuable land would soon become available to scoop up. Ms. Lysyk seemed to agree. She said that the government’s flawed decision-making was “biased” in favour of the builders. In fact, she said that those who had bought the newly freed-up lands could make as much as $8.3 billion once the sites are developed.

“We found that how the land sites were selected was not transparent, fair, objective, or fully informed,” Ms. Lysyk wrote. “What occurred here cannot be described as a standard or defensible process.”

For his part, the Integrity Commissioner said the government had violated ethics. He accused then-minister of housing Steven Clark of turning a blind eye when Mr. Amato broke conflict-of-interest rules and shared privileged information.

“It may seem incredible that Minister Clark would have chosen to stick his head in the sand on such an important initiative being undertaken by his ministry but I believe that was exactly what he did,” wrote Mr. Wake.

THE Fallout
Just weeks after both reports were issued, Mr. Amato resigned and on September 4, Mr. Clark left his post as housing minister, although he remains an MPP. Then on September 20, a second cabinet minister, Kaleed Rasheed, resigned in connection to the scandal.

Finally, following two days of caucus and cabinet meetings, on September 21, Premier Ford apologized and announced that his government was changing course.

"I made a promise to you that I wouldn't touch the Greenbelt. I broke that promise. And for that I'm very, very sorry," the premier said. "It was a mistake to open the Greenbelt. It was a mistake to establish a process that moved too fast. This process, it left too much room for some people to benefit over others. It caused people to question our motives. As a first step to earn back your trust, I’ll be reversing the changes we made and won’t make any changes to the Greenbelt in the future."

Land-swap opponents celebrated the announcement. However, all three opposition parties said many questions remain unanswered, and Green Party Leader Mike Schreiner called for a public inquiry.

“How can we trust that he won’t try the same thing again?” he asked. "We can't let this reversal be a get-out-of-jail-free card for Premier Ford or his cabinet." ★

DEFINITIONS

AUDITOR GENERAL: an independent officer of the government who examines government operations, finances, and records
CABINET: a group of government members who are chosen by the leader to give advice and be responsible for its policies
CAUCUS: a group of people who meet to discuss a particular issue or to work together for a shared political goal
CONFLICT OF INTEREST: a situation in which somebody has two jobs, aims, roles, etc. and cannot treat both of them equally and fairly at the same time
ENCROACH: to slowly begin to cover more and more of an area

CANADA’S PROTECTED FARMLANDS
Ontario’s Greenbelt encompassing Toronto isn’t the only one in the province. A Greenbelt was established around Ottawa in 1956. It is a 203-square-kilometre horseshoe-shaped collection of farmland, forests, and wetlands that border the west, south, and east ends of the city.

In Quebec, the Regional Agricultural Conservation maintains an agricultural zone to protect farming that covers 63,000 square kilometres. And British Columbia’s Agricultural Land Reserve prioritizes 47,000 square kilometres for farming, restricting its use for non-agricultural purposes.
1. Name the premier of Ontario. Which political party is in power in this province?

2. Who created the Ontario Greenbelt? When was this protected area set up and why? Explain.

3. Describe the area covered by the Greenbelt.

4. What is the Golden Horseshoe? Where is it located and how many people live in this region?

5. Describe the recent population growth in Ontario.

6. What did the provincial government announce late last year regarding Ontario’s Greenbelt?

7. List the two main reasons why some people were opposed to this policy reversal.

8. What did the Ontario Auditor General find when she investigated?

9. What did the Ontario Integrity Commissioner find when he investigated?

10. What did Premier Ford announce on September 21?
QUESTIONS FOR FURTHER THOUGHT

1. The article quotes Gideon Forman, an analyst with the Suzuki Foundation: "This idea that you can destroy part of the Greenbelt and then somehow make up for it – it’s just not the way the natural world works. When you start to take chunks of the Greenbelt out of the Greenbelt, you compromise the integrity of an ecosystem. And that’s what’s so damaging." What do you think Mr. Forman means by this? Explain.

2. Premier Doug Ford claims that with the recent population growth in Ontario, his government had no choice but to allow homes to be built in the Greenbelt. Do you agree with this statement? Give reasons to support your response.

3. Two separate inquiries into this controversy, one by the Auditor General and the other by the Ontario Integrity Commissioner, have described the actions of the Ford government as not defensible and unethical. For what reasons do you agree with this characterization? For what reasons do you disagree?

YOUR TASK:

Examine the editorial cartoon. Then, use the questions below to help you decode the cartoon’s message. Be specific and include as many details as possible in your answers. Note: The Editorial Cartoons resource page (p. 52) may be useful.

INITIAL READING: What can an initial look reveal?
1. Glance quickly at the cartoon. What is your first impression – your “gut response”?
2. Consider your background knowledge. What do you already know about the context of the cartoon – the time, place or situation? (List key facts.)

CLOSER LOOK: What’s happening in the cartoon?
3. Describe what you see and read in the cartoon.

DRAW CONCLUSIONS: What overall impression can you draw?
4. Identify possible biases. Whose perspective or point of view is expressed in the cartoon?
5. Explain the overall message of the cartoon in a paragraph. (Remember, a good interpretation is specific and detailed.) ★
Write the inner and outer dialogue for two or more people in this scene. Show what the person is thinking/feeling (inner voice) and saying (outer voice). A believable conversation conveys appropriate ideas, thoughts, feelings or reactions; is on topic; extends the details of the scene; and is convincing.

There are a number of reasons we read, and setting a purpose for reading – knowing WHY we are reading – helps us to focus on important information and to better understand and remember what we read. It also helps us decide HOW we will read the text.

We don’t read all texts for the same purposes or in the same way. For example, we read an instruction manual for a new Blu-ray player for a different reason than we read a book or a website. How we will read it – the strategies we use – will also differ. We are more likely to skim to find the information we need in a manual. Once we find what we need, we might read the instructions carefully to figure out what to do. Then, we stop reading, put the manual down, and carry out the steps. We may have to reread if we get confused or forget what to do.

This is a very different approach than the one we would use to read a book. When we read a book, we usually read cover-to-cover. We read carefully so we don’t miss any details because we want to understand the whole story. Sometimes we make connections or create images in our minds as we read to help us better understand what we are reading. Depending on its length, we may put the book down before we finish reading it but we will start reading where we left off.

Good readers are flexible and responsive. This means that they match their reading strategies to their purpose for reading. What types of text do you read? Why do you read them? What strategies do you use to read each of these texts? The chart below is a summary of the main purposes for reading and what each entails.

Students Can Work In Word/Google Docs...

Did you know...

. . . that each issue of *What In The World?* includes a PDF file (complete document) and a Word file (articles and questions only).

Students can complete assignments directly in the Word file. Teachers can email the file to students or post it on the Internet. The Word file also allows teachers to:

- easily modify and format content including changing fonts and text sizes
- create a PDF document and use Adobe Reader’s ‘Read Out Loud Mode’
- save paper and copying costs and help protect the environment
- promote and encourage students’ computer skills

Password Security

There are three ways to access data from a Word file that is password protected:

1) Select the data you wish to Copy and then Paste it into any word processing program. Use Select All to copy the entire document.

2) Import the entire Word file into LibreOffice (or another similar program) and then save as a new file

3) To remove the password from a protected Word file, use Save As to make a new copy of the file. You can then change the Security settings and remove the password.

Google Docs and LibreOffice

- You can easily upload the Word file to Google Docs and share it with students or other teachers.
- You can translate Google Docs into another language (see Tools>Translate document) but you will need to edit the document to suit your requirements. Google Docs can translate into over 100 languages including Spanish, Mandarin, and German.
- LibreOffice is a free alternate to Microsoft Office and offers the same functionality. It’s easy to install and use. See: www.libreoffice.org
